- Netherlands / Western Europe
- ISO/IEC 27001:2005 audit and certification
- SOC 1 and SOC 2-SSAE 16/ISAE 3402-certification

Technology

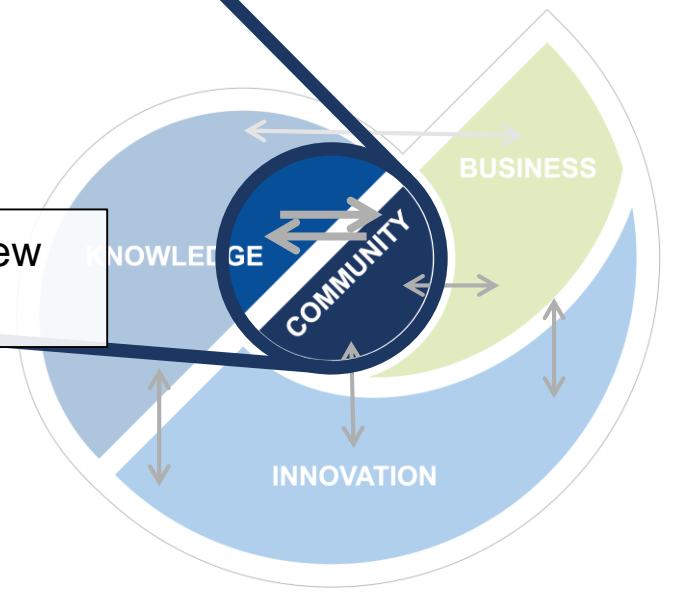

innocos supports and uses systematic interactions

EXAMPLE of an interaction

The more transparency on existing skills (knowledge), the greater the willingness to network. (Community).

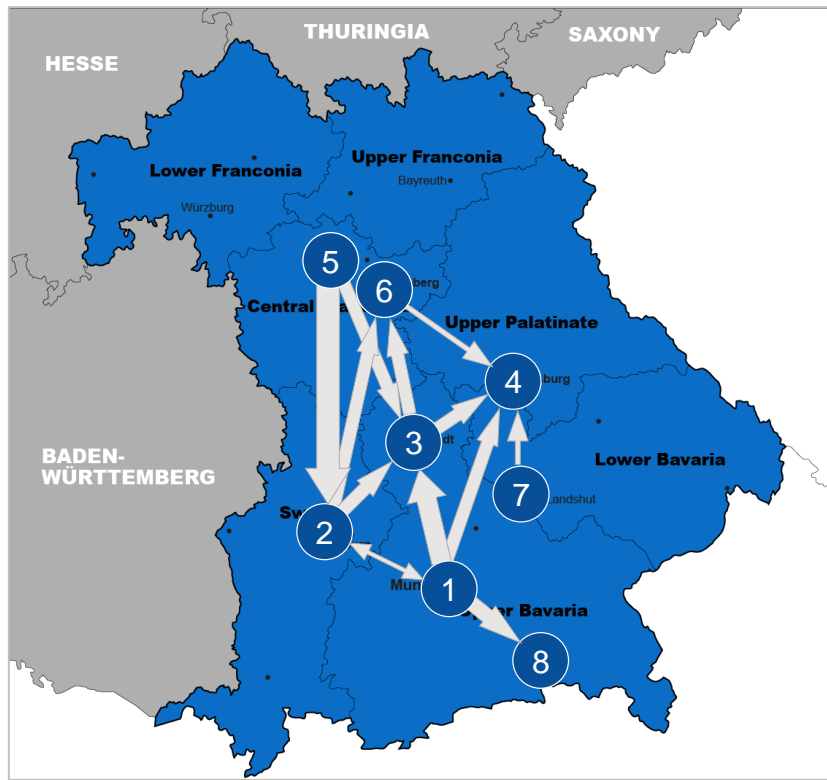

The more networking (contact density) the more new knowledge is shared and available in the network.

innocos' network forming effect is proven by the Technical University of Munich (TUM)

Example: Examination of the crosslinking of companies based on geographical data in the network "Carbon Connected"*

(*innocos trusted network of the leading cluster MAI Carbon))

Types of crosslinking

- project partners
- working groups
- customers
- suppliers

- | | |
|---------------------|--------------------|
| 1 Munich | 5 Fürth |
| 2 Augsburg | 6 Nuremberg |
| 3 Ingolstadt | 7 Landshut |
| 4 Regensburg | 8 Rosenheim |

geographical networking

innocos is used by over 2000 companies and organizations

Trusted Social Network
